

# INCLUDED WHEN ADOPTING A PUPPY:

When adopting a puppy from Amadeuze Labrador Kennel you can expect to take home a puppy that-

- ★ Is at least 8 weeks old;
- ★ Had an ID Microchip inserted;
- ★ Previously had 2 sets of vaccinations against Parvu, the first at age 4 weeks and the next at age 6 weeks;
- ★ Has been treated against internal parasites (deworming) every 2 weeks since the age of 2 weeks old;
- ★ Has been treated against external parasites when 1 month old;
- ★ Has a veterinary booklet, signed by the veterinarian, indicating the vaccinations and parasite treatments the puppy received;
- ★ Has been inspected by the veterinarian twice and declared healthy and fit for its age;
- ★ Has been professionally evaluated by an animal behaviorist for a temperament assessment test to ensure that puppies and their new families are compatible with each other to the best of our knowledge;
- ★ Has been fed top quality puppy food since age 3 weeks, when starting to feed on solid food;
- ★ Has a few day's supply of puppy food to accompany him/her to his/her new home;
- ★ Has complete instructions/guidelines for the new owner of the puppy regarding care and feeding for him/her;
- ★ Was sold with a Terms of Agreement document (Contract), signed by the breeder and new owner in the presence of 2 witnesses, which includes an agreement that the puppy should not be sold, put down or re-homed without contacting me (the breeder) first, who has the right to call back the agreement, should circumstances deem it necessary;
- ★ Has a KUSA pedigree certificate which will be issued and posted to the new owner via registered mail as soon as the KUSA has completed registration of the litter.
- ★ Has a breeder that will sincerely appreciate regular feed-back (with pictures, if possible) regarding the well-being, growth and development of the puppy, and can be contacted at any time for advice when needed!
